Hi Dr. Florez,

We've got a 7yr old lab/spaniel. Lately we've noticed blood in her urine (now that we have snow!) Any thoughts?

Thanks,

Tom & Pam

Dear Tom and Pam,

Your pet might be either developing a bladder infection, bladder stones or other problems related to the urogenital system.

I would advise you to take your pet to your veterinarian for further diagnostic and treatment since can be an array of issue and it cannot be resolve on the Internet.

Best of luck,
Diego Fernando Florez, DVM
