As most of you know, I've always been a fan of [Sleepypod](#)'s products. They do one thing and they do it well. Make perfect pet beds. Our first review was on the SleepyPod, and now they have the Sleepypod Air.

This carrier is more than your average carrier. It's something that will revolutionize in-cabin pet travel. The Air adapts to your situation. It can be strapped to a pullman, stored under the seat, safely strapped into a seatbelt, or just carried. On top of that, it folds completely flat with just a flick of the wrist so when you're not using it, it's out of sight.

This carrier has air mesh that allow your pet to breathe a little easier on any journey, the heavy duty canvass makes for a lightweight, yet protective way to transport, and the handles and long shoulder strap make it simple for anyone to use. Side pockets are perfect for storing food, water and important papers, as well as a leash and harness, without adding excess bulk or detracting from space your pet needs.
